

What do Teachers have to say about Reality Check Day???

- ✓ “It was very exciting to see students put into these real life situations because it was obvious that students were not aware of the daily financial/managerial challenges faced as an adult. The experience was beyond compare.”
- ✓ “Training was beneficial for students. Covered many life skills which a lot of their parents do not discuss with them at home and that are not covered in classes. Students were excited and saw value in program. Many parents (no tangible numbers) made comments at Parent Teacher conference regarding how valuable program was and how excited their students were to do it.”
- ✓ “Our Team loved it and thought it was a great eye-opening experience for the kids. The students were engaged and it allowed them to view things from their parents’ perspective. They probably hear from adults all the time that things are going to be challenging for them when they grow up, but experiencing these challenges first hand, although they were enactments, did give them a true reality check. Some of our students have never known what it’s like to struggle and this gives them an idea of what some of the less fortunate students go through and vice versa.”
